Project Work

Website for a restaurant-
The project included building a website for a restaurant using Mern stack with Mongodb. The website was made fully interactive and responsive.

Movie ticket (Web Based)-
Continuing the ERP project I worked on developing an ERP system using Advanced Java concepts such as spring. Using Java added an extra level of security and added to the overall optimization of the site.

Attendance System for student (Fullstack project).
The website was made fully interactive and responsive by using php, html, css, javascript and for database connection xampp is used. The project includes attendance download option which downloads an excel file on faculty's device.
